

City-Wide Meeting on Green Infrastructure

Did you know that...

- Thousands of Right-of-way Bioswales will be built around NYC to manage stormwater runoff?
- Thirty green infrastructure projects will be built through the Green Infrastructure Grant Program?
- Rain gardens, green roofs, porous paving, and other types of green infrastructure will be built on public schools and NYC Housing Authority properties?
- DEP has two years of monitoring data available on green infrastructure projects around the city?

Come find out more about this exciting program that will green NYC and improve water quality in our harbor. To read the full 2012 Annual Report, visit www.nyc.gov/dep.

WHAT

Please join DEP for a presentation on:

- 2012 Green Infrastructure Annual Report
- 2012 Green Infrastructure Pilot Monitoring Report
